### 1. General comments

Under the terms of the module handbook and of the practical experience regulations, the integrated practical work phase (Work placement I / Module 15 and Work placement II / Module 16) in the Bachelor degree course in Heilpädagogik/Inklusive Pädagogik includes two compulsory work placements. The practical work phase is central and fundamental to obtaining state recognition (cf. § 3 SobAG NRW<sup>2</sup>).

The aim of the practical work phase is to introduce students to operating independently in the field of Heilpädagogik/Inklusive Pädagogik, thus giving them the opportunity to:

- review their own motivation to study,
- develop skills for profound and practicable professional competence while putting this to the test by applying the theoretical knowledge they have acquired,
- get to know a selected field of action in greater depth, including its structures and action processes,
- strengthen their professional socialisation and identity as well as their reflective competence in interaction with values, norms and professional principles.

The student shall be assigned in such a way that he/she is given the opportunity to get to know the activities in the respective professional field in accordance with the stated objective of the practical work phase. This includes insights into and participation in regular processes and tasks such as: individual and group work, project work, team meetings, talks with parents, network and social environment work, conceptualisation, support planning, administrative activities including the inspection of records.

The student shall be supervised by a specifically named practical work supervisor who is both professionally qualified and experienced. As a direct contact person, the practical work supervisor has a key function in the qualification process.

### 2. Time frame

The integrated practical work phase (Work placement I + II) shall comprise a minimum total of 105 working days. The requisite working days/hours shall be completed in two different practical work institutions, whereby Work placement I must comprise 80 working days (= 600 hours) and Work placement II must comprise 25 working days (= 187,5 hours). Work placement I / 80 working days must be completed in a single block and working full-time. For part-time students an individual distribution of the 600 working hours is possible.

The requisite working hours are always net working hours. Possible closing times due to public holidays, etc. shall not reduce the total number of hours that must be completed.

In the event of illness causing a student to fall short of the total of the 105 working days required for state recognition, the missing days must be completed subsequently – the time frame for the practical work phase will be extended accordingly.

Attendance times for participation in reflection activities in the university context shall not be credited as working time. The practical work institution shall release the student so that he/she can participate in the obligatory reflection activities in Module 15.

### 3. Obligations on the student

The student shall actively cooperate with the practical work institution and/or the professional instructor on the timing and practical arrangements of the practical work phase in accordance with the agreements made.

The student shall discharge the tasks assigned in the practical work institution and the opportunities these offer in line with the objectives of the practical work phase.

The student shall participate regularly in the compulsory activities reflecting on the practical work phase.
